WORKING PAPERS	“Human Capital, Immigration, and Skill Composition” [Job Market Paper]
----------------	--

Abstract: The spatial correlation between worker skills and industry skill-intensity is amongst the best documented features of US economic geography. However, the causal impact of human capital on the industrial skill composition of US regions remains largely unknown. This paper studies how immigration-induced shifts in historical human capital affect the contemporary industrial skill composition of US counties. Leveraging quasi-random origin-by-destination immigration patterns from 1850 to 2010, I isolate exogenous variation in skill-specific local working-age population at the county level for 1970-2010. I find that an increase in medium- and high-skill worker shares raises employment and establishment shares in high-skill industries and reduces them in low-skill industries. The nontradable sector captures the major portion of the positive impacts, while the tradable sector absorbs the main fraction of the negative effects. The empirical findings are consistent with a CES model, in which representative firms with differentiated products employ labor of a certain skill type more intensively.

[“Holy Work: How Religiosity Shapes Local Labor Market Outcomes”](#) (with Mary Peshoff)

Abstract: We utilize a novel identification strategy to quantify the impacts of religiosity on US local labor markets. Exploiting the quasi-random variation in historical immigration from 1850 to 2010 and origin-specific religiosity, we isolate exogenous variation in the religious composition of US commuting zones for 1940-2010. We find that, relative to the religiously Unaffiliated share, an exogenous increase in Protestant, Orthodox Christian, and “Other” religious shares decreases employment and marriage shares, whereas Jewish share increases employment and college education shares along with mean income in commuting zones. The share of married women in the workforce falls with all religious shares except Jewish share. Our findings reveal substantial heterogeneity by gender. We

demonstrate both the causal effect of religiosity and the heterogeneous impacts of different faiths.

WORKS IN PROGRESS

“Firm Creation under DACA” (*Email for Draft*)

Abstract: Undocumented immigration remains a central issue within US immigration policy debates, yet little is known about how legalization programs affect firm dynamics and labor market composition. In this paper, I study the impact of a particular legalization reform, Deferred Action for Childhood Arrivals (DACA), enacted in 2012, on establishment and employment outcomes. I exploit variation in pre-treatment exposure to the policy across sectors and commuting zones, using a triple-difference estimator. I find that DACA increases establishment entry by 2.4 percent in more exposed sectors and temporarily reduces exit rates, suggesting market expansion and entrepreneurship amongst formerly undocumented workers. The share of native workers rises by 2.1 percentage points, whereas that of ineligible undocumented workers declines by a similar magnitude, demonstrating labor substitution. Heterogeneity estimates across sectoral skill types reveal that these effects are concentrated in low- and medium-skill sectors. These results have important policy implications such that immigrant regularization can enhance firm dynamism and facilitate labor reallocation, without displacing native workers.

“The Effect of Managerial Risk Preferences on Capital Structure Decisions” (with *Joshua Scott and Eddy Junarsin*)

TEACHING EXPERIENCE

Miami University

ECO 202: Principles of Macroeconomics (4 sections)

Fall 2025

Louisiana State University

Course Instructor

Fall 2022 - Spring 2025

ECON 2010: Principles of Macroeconomics (2 sections per semester, in-person)

ECON 2010: Principles of Macroeconomics (1 section, online)

Summer 2024

Excellence in Teaching Award

Fall 2024

Tutorial Instructor

Fall 2020 - Spring 2022

ECON 2030: Economic Principles (4 sections per semester)

Teaching Assistant

Fall 2019 - Spring 2020

ECON 4710: Aggregate Economic Analysis

ECON 2035: Money, Banking, and Macroeconomic Activity

ECON 2011: Principles of Macroeconomics (Honors)

OTHER EXPERIENCE

Research Assistant for Dr. Thomas Douthat,

Department of Oceanography and Coastal Sciences, LSU

Summer 2023

Project: “The Effects of Hazards and Disaster Events on Migration to Inform Coastal Decision-Making and Restoration in Louisiana”

(Supported by the US Department of Treasury under the RESTORE Act)

AWARDS AND SCHOLARSHIPS	Teaching Award	
	Excellence in Teaching Award, Department of Economics, LSU	2024
	Other Awards	
	Faculty Research Fund, Miami University	2025
	Graduate Assistantship, LSU	2019 - 2025
	T.J. Moran Superior Graduate Student Support Fund, LSU (x2)	2024
	Graduate Student Association Travel Award, LSU (x3)	2024
	Travel Award, Department of Economics, LSU	2023 & 2024
	European Economic Association Travel Grant, <i>Netherlands</i>	2024
	Scholarships	
	Summer School Scholarship, <i>Mexico</i>	2024
	DAAD Master ERP Scholarship, <i>Germany</i>	2019-2021
	Full Undergraduate Scholarship, <i>Azerbaijan</i>	2014-2019
CONFERENCES AND SEMINARS	2025: APPAM Fall Research Conference (47th, <i>scheduled</i>), <i>Seattle, WA</i> SOLE-EALE-AASLE World Labor Conference (6th), <i>Toronto, Canada</i>	
	2024: SEA Annual Meeting (94th), <i>Washington, DC</i> Summer School (3rd), “Economics of Migration,” <i>Mexico City, Mexico</i> EEA-ESEM (39th-76th), Erasmus University, <i>Rotterdam, Netherlands</i> Brown Bag, LSU Department of Economics, <i>Baton Rouge, LA</i>	
	2023: SEA Annual Meeting (93rd), <i>New Orleans, LA</i> Brown Bag, LSU Department of Economics, <i>Baton Rouge, LA</i>
