WORKING PAPERS	“Human Capital, Immigration, and Skill Composition” [Job Market Paper]
----------------	--

Abstract: The spatial correlation between worker skills and industry skill-intensity is amongst the best documented features of US economic geography. However, the causal impact of human capital on the industrial skill composition of US regions remains largely unknown. This paper studies how immigration-induced shifts in historical human capital affect the contemporary industrial skill composition of US counties. Leveraging quasi-random origin-by-destination immigration patterns from 1850 to 2010, I isolate exogenous variation in skill-specific local working-age population at the county level for 1970-2010. I find that an increase in medium- and high-skill worker shares raises employment and establishment shares in high-skill industries and reduces them in low-skill industries. The nontradable sector captures the major portion of the positive impacts, while the tradable sector absorbs the main fraction of the negative effects. The empirical findings are consistent with a CES model, in which representative firms with differentiated products employ labor of a certain skill type more intensively.

[“Holy Work: How Religiosity Shapes Local Labor Market Outcomes”](#) (with Mary Peshoff)

Abstract: We utilize a novel identification strategy to quantify the impacts of religiosity on US local labor markets. Exploiting the quasi-random variation in historical immigration from 1850 to 2010 and origin-specific religiosity, we isolate exogenous variation in the religious composition of US commuting zones for 1940-2010. We find that, relative to the religiously Unaffiliated share, an exogenous increase in Protestant, Orthodox Christian, and “Other” religious shares decreases employment and marriage shares, whereas Jewish share increases employment and college education shares along with mean income in commuting zones. The share of married women in the workforce falls with all religious shares except Jewish share. Our findings reveal substantial heterogeneity by gender. We demonstrate both the causal effect of religiosity and the heterogeneous impacts of different faiths.

WORKS IN PROGRESS

“Firm Creation under DACA”

Abstract: Undocumented immigration remains a central issue within US immigration policy debates, yet little is known about how legalization programs affect firm dynamics and labor market composition. In this paper, I study the impact of a particular legalization reform, Deferred Action for Childhood Arrivals (DACA), enacted in 2012, on establishment and employment outcomes. I exploit variation in pre-treatment exposure to the policy across sectors and commuting zones, using a triple-difference estimator. I find that DACA increases establishment entry by 2.4 percent in more exposed sectors and temporarily reduces exit rates, suggesting market expansion and entrepreneurship amongst formerly undocumented workers. The share of native workers rises by 2.1 percentage points, whereas that of ineligible undocumented workers declines by a similar magnitude, demonstrating labor substitution. Heterogeneity estimates across sectoral skill types reveal that these effects are concentrated in low- and medium-skill sectors. These results have important policy implications such that immigrant regularization can enhance firm dynamism and facilitate labor reallocation, without displacing native workers.

TEACHING EXPERIENCE

Course Instructor, Department of Economics, LSU Fall 2022 - Present
ECON 2010: Principles of Macroeconomics (2 sections)

Tutorial Instructor, Department of Economics, LSU Fall 2020 - Spring 2022
ECON 2030: Economic Principles (4 sections)

Teaching Assistant, Department of Economics, LSU Fall 2019 - Spring 2020
ECON 4710: Aggregate Economic Analysis
ECON 2035: Money, Banking, and Macroeconomic Activity
ECON 2011: Principles of Macroeconomics (Honors)

OTHER EXPERIENCE

Research Assistant for Dr. Thomas Douthat,
Department of Oceanography and Coastal Sciences, LSU Summer 2023
Project - “RESTORE: Natural Disaster-Driven Migration in Louisiana”

AWARDS AND SCHOLARSHIPS

Teaching Award
Excellence in Teaching Award, Department of Economics, LSU 2024

Other Awards
Graduate Assistantship, LSU 2019 - Present
T.J. Moran Superior Graduate Student Support Fund, LSU (x2) 2024
Graduate Student Association Travel Award, LSU (x3) 2024
Travel Award, Department of Economics, LSU 2023 & 2024
European Economic Association Travel Grant, *Netherlands* 2024

Scholarships
DAAD Master ERP Scholarship, *Germany (declined)* 2019-2021

CONFERENCES AND SEMINARS	94th Annual Meeting of the Southern Economic Association (presenter and discussant), Washington, DC Nov, 2024 3rd Mexican Summer School on the “Economics of Migration” (participant and presen- ter), Mexico City, Mexico Sep, 2024 39th Meeting of the European Economic Association and 76th European Meeting of the Econometric Society (presenter), Erasmus University, Rot- terdam, Netherlands Aug, 2024 93rd Annual Meeting of the Southern Economic Association (presenter), New Orleans, LA Nov, 2023 Brown Bag Research Seminar, LSU Department of Economics (presenter), Baton Rouge, LA Dec, 2021; Nov, 2022; May, 2023; Apr, 2024; Oct, 2024
